

Ethical Hacking & Penetration Testing

Course Title	Ethical Hacking & Penetration Testing
Country	Malaysia
Location	4-5 Star Hotel
Time	8AM - 2PM
Date	12 - 16 January 2026

Day 1: Introduction to Ethical Hacking & Cybersecurity

- Overview of Ethical Hacking concepts
- Roles of White Hat, Black Hat, and Gray Hat hackers
- Fundamentals of cybersecurity
- Legal and ethical considerations
- Hacking methodologies and frameworks

Day 2: Reconnaissance & Vulnerability Assessment

- Information gathering techniques
- Network scanning and enumeration
- Vulnerability identification
- Risk assessment and impact analysis
- Vulnerability scanning tools

Day 3: System & Network Exploitation

- Network and system exploitation techniques
- Password and authentication attacks
- Malware and ransomware attacks
- Social engineering and email attacks
- Post-exploitation basics

Day 4: Web Application Penetration Testing

- Web application security fundamentals
- SQL Injection and XSS attacks
- Session and access control testing
- Packet analysis and traffic monitoring
- Practical attack simulations

Day 5: Reporting, Defense & Practical Project

- Full penetration testing exercise
- Professional reporting and documentation
- Security recommendations
- System hardening techniques
- Final assessment and course review
