

Sustainable Team Dynamics

Manchester, UK

1st – 5th July 2024 (5 Days)

Overview:

In contemporary sustainable organizations, adaptability, teamwork, and effective communication are essential for success. Since the onset of COVID-19, businesses have encountered operational challenges stemming from uncertainties in supply chains and rapidly changing customer needs. Therefore, the ability to seamlessly implement change is vital in a business environment. Teams must establish strong collaboration and adopt a business ownership perspective to drive processes. Moreover, team members need to be adaptive and eager to learn new skills to effectively serve the organization.

Effective communication, both verbal and non-verbal, underpins the seamless flow of ideas and information crucial for achieving organizational goals. Slow or ineffective communication can reduce profits due to wasted time and effort, causing frustration among team members. Additionally, Artificial Intelligence (AI) technologies, such as ChatGPT and others, are now essential for all businesses, requiring teams to easily incorporate them. Therefore, individuals must be effective communicators and must use AI for their advantage.

Finally, organizations and teams must focus on sustainability in their operations by reducing time waste, energy consumption, paper usage, transportation, etc. Understanding sustainability and meeting health and safety (HSSE) requirements are vital for all team members.

Target Audience:

Mid-Level Managers and Supervisors; Entry-Level Employees; Engineers, HR employees, Executives and Leaders; Entrepreneurs and Business Owners; Professionals in Transition; Cross-Functional Teams; Anyone Seeking Professional Growth.

Objectives:

- Achieve high performance by driving goals, taking initiatives and planning ahead, within and outside of own area of responsibility.
- Act with commitment to the K-Group and its values, taking accountability for own role in achieving wider organisational objectives.
- Build people capability by seeking and participating in opportunities for learning and being adaptable to change.
- Achieve business objectives through teamwork, partnership, cooperation and commitment to a shared vision and goals.
- Build effective relationships and networks by communicating in an open, direct, transparent and trustworthy manner.
- Understand the challenges and risks in using artificial intelligence technologies for business purposes and to use AI in a secure, effective, responsible manner.
- Prevent, address and eliminate HSSE risk as the first priority, to promote the well-being of self, others, society, and environment, and to protect the organisation's assets.
